

Build Report — Mileage Tracker App

Chain: full-app-delivery (20260611T173641Z_095dea)
Story: Build a mileage tracker app with login, trip logging, vehicle management, and year-end IRS deduction summary
Target repo: raghu-cmyk/mileage-tracker-fresh
Generated: 2026-06-11 18:03:07 UTC

1. Job Summary

Order	Job ID	Type	State	Duration
1	20260611T173642Z_411b3c	plan	completed	1m 9s
2	20260611T174815Z_c6034e	implement (retry)	failed	0s
3	20260611T174910Z_1534f5	implement	completed	8m 31s
4	20260611T175741Z_4872d3	validate	completed	2m 59s
5	20260611T180143Z_9ab137	deliver	completed	33s
6	20260611T180216Z_8b200f	report	running	0s

Chain order: plan → implement → validate → deliver → report. One implement attempt failed (provider not registered) and was retried.

2. Requirements → GitHub Issues Mapping

- Story requirements:**
- User login and authentication
 - Trip logging (business/personal mileage)
 - Vehicle management
 - Year-end IRS deduction summary

GitHub Issue	Requirement(s) Covered
#1 User Authentication & Login	User login and authentication
#2 Trip Logging	Trip logging (business/personal mileage)
#3 Vehicle Management	Vehicle management
#4 Year-End IRS Deduction Summary	Year-end IRS deduction summary
#5 Design & Aesthetic	Cross-cutting visual design system for all features

Delivery PR: <https://github.com/raghu-cmyk/mileage-tracker-fresh/pull/6> (closes #1–#4; #5 design issue remains open)

3. Per-Job Agent Activity Log (Excerpts)

1. plan — 20260611T173642Z_411b3c
Decomposed the mileage tracker requirements into ****5 GitHub issues**** on `raghu-cmyk/mileage-tracker-fresh`. Requirements were taken from the chain seed (`Build a mileage tracker app with login, trip logging, vehicle management, and year-end IRS deduction summary`); the target repo currently only has a placeholder README.

Created Issues

Feature issues (`plan-task`)

1. ****User Authentication & Login**** – registration, login/logout, session management, per-user data isolation
<https://github.com/raghu-cmyk/mileage-tracker-fresh/issues/1>

2. ****Trip Logging**** – CRUD for trips, business vs personal purpose, vehicle association, totals
<https://github.com/raghu-cmyk/mileage-tracker-fresh/issues/2>

3. ****Vehicle Management**** – fleet CRUD, default vehicle, archive with historical trip linkage
<https://github.com/raghu-cmyk/mileage-tracker-fresh/issues/3>

4. ****Year-End IRS Deduction Summary**** – tax-year aggregation, per-vehicle breakdown, standard mileage rate calculation, export/print
<https://github.com/raghu-cmyk/mileage-tracker-fresh/issues/4>

Design issue (`design`)

5. ****Design & Aesthetic – Mileage Tracker Visual Design System**** – "Road Ledger" color palette with hex values, Inter typography scale, 8px spacing grid, sidebar/bottom-nav layout, component specs, and accessibility requirements
<https://github.com/raghu-cmyk/mileage-tracker-fresh/issues/5>

Completion

The `gate\_min\_issues` check passes (4 feature issues $\geq$ minimum of 3), and job completion was signaled:

```
...
mc done --summary "Created 5 planning issues (incl. design) for Build a mileage tracker app with login, trip logging, vehicle management, and..."
...
```

2. implement (retry) — 20260611T174815Z_c6034e

(no agent log recorded)

3. implement — 20260611T174910Z_1534f5

```
| Field | Value |
|-----|-----|
| **Branch** | `feature/mileage-tracker-app` |
| **Base branch** | `mc_webhook_test` |
| **Target repo** | `raghu-cmyk/mileage-tracker-fresh` |
| **Commit** |
| `7df1acd` | (https://github.com/raghu-cmyk/mileage-tracker-fresh/commit/7df1acd98f385d20937cdb011f0109838f20184e)
|
```

App features delivered

- ****Auth**** – register, login, logout, protected routes
- ****Trips**** – CRUD with business/personal purpose, odometer or manual distance
- ****Vehicles**** – CRUD with default vehicle and archival
- ****IRS reports**** – year-end summary with per-vehicle and monthly breakdowns, print/export
- ****Design system**** – Road Ledger palette, Inter typography, responsive sidebar/bottom nav

Job completion signaled via `mc done`.

****Branch:**** `feature/mileage-tracker-app` (based on `mc\_webhook\_test`)

****Commit:**** <https://github.com/raghu-cmyk/mileage-tracker-fresh/commit/bf2695f3d0d136e9a3985deddf17f1fc8086428d>

The mileage tracker is implemented and pushed to `raghu-cmyk/mileage-tracker-fresh`.

What was delivered

Flask + SQLite app in `mileage-tracker/` with:

- ****Login / registration**** – per-user sessions and data isolation
- ****Trip logging**** – create, view, edit, delete; business/personal purpose; odometer or manual distance
- ****Vehicle management**** – add/edit vehicles, default vehicle, archive inactive
- ****IRS year-end reports**** – business miles by vehicle and month, standard mileage rate, estimated deduction

Verification

- 4 in-process pytest tests pass (no server started)
- `no\_todo\_markers` acceptance gate passes
- Removed accidentally committed `tests/\_\_pycache\_\_` from the remote branch

Completion

`mc done` was called for job `20260611T174910Z\_1534f5`. The daemon should mark the implement stage complete on the next gate evaluation cycle.

4. validate — 20260611T175741Z_4872d3

Evidence

- `artifacts/validation\_evidence.json` – route status codes and results
- `artifacts/fetch\_evidence.json` – source branch/commit info
- `artifacts/pytest\_output.txt` – test run output
- `VALIDATION\_PASSED` – one-line pass summary

```
`mc done` was called for job `20260611T175741Z_4872d3`.
Validation passed. The mileage tracker app on the candidate branch loads and runs without errors.

## Validation Summary

**Candidate:** `feature/mileage-tracker-app` @ `bf2695f` from `raghu-cmyk/mileage-tracker-fresh`

**Method:** In-process Flask `TestClient` (no long-lived server)

### Results

| Check | Result |
|-----|-----|
| Dependencies installed | flask, werkzeug, pytest |
| Pytest smoke tests | **4/4 passed** |
| Route probes | **14/14 OK** |

**Routes exercised:**
- `/` → 302 redirect to `/login`
- `/login`, `/register` → 200
- `POST /register` → 302 → dashboard
- `/dashboard`, `/trips`, `/vehicles`, `/vehicles/new`, `/trips/new`, `/reports`, `/account` → 200
- `/static/style.css` → 200
- Unauthenticated `/dashboard` → 302 to login

### Evidence

- `artifacts/validation_evidence.json` – route status codes and responses
- `artifacts/fetch_evidence.json` – source branch sync details
- `artifacts/pytest_output.txt` – full pytest output
- `VALIDATION_PASSED` – created

`mc done` reported success for job `20260611T175741Z_4872d3`.
```

5. deliver — 20260611T180143Z_9ab137

```
Delivery complete. Summary:

## Branch confirmed

Validated work is on `feature/mileage-tracker-app` in `raghu-cmyk/mileage-tracker-fresh` at commit
[bf2695f](https://github.com/raghu-cmyk/mileage-tracker-fresh/commit/bf2695f3d0d136e9a3985deddf17f1fc8086428d),
matching the validation artifacts.

## Pull request opened

**https://github.com/raghu-cmyk/mileage-tracker-fresh/pull/6**

| Field | Value |
|-----|-----|
| **Head** | `feature/mileage-tracker-app` |
| **Base** | `mc_webhook_test` |
| **Title** | Mileage tracker: auth, trips, vehicles, and IRS year-end reports |

The PR covers the Road Ledger Flask app (auth, trip logging, vehicle management, IRS year-end reports), validation
evidence (14/14 routes, 4/4 pytest tests via `full-app-delivery`), and closes #1–#4. Issue #5 (design system) is
left open as a follow-up.

## Gates & completion

- `gate_pr_open.sh mc_webhook_test` – **PASS** (1 open PR)
- `mc done` – signaled for job `20260611T180143Z_9ab137`
```

6. report — 20260611T180216Z_8b200f
(empty log)

4. Validation Results (Gate Outcomes)

Stage	Gate	Outcome	Evidence
plan	gate_min_issues.sh (≥3 issues)	PASS	5 GitHub issues created (#1–#5)
implement (retry)	no_todo_markers	FAIL	Runner crash: provider 'claude-code' not registered

implement	no_todo_markers	PASS	No incomplete-work markers in workspace
validate	test -f VALIDATION_PASSED	PASS	14/14 routes OK; 4/4 pytest passed
deliver	gate_pr_open.sh mc_webhook_test	PASS	PR #6 open (feature/mileage-tracker-app → mc_webhook_test)
report	report-*.pdf exists (>2k)	PENDING	This report

Validation evidence: All 14 routes OK — branch feature/mileage-tracker-app @ bf2695f3

5. Total Build Time

Earliest job start: 2026-06-11 17:36:42 UTC
Latest job finish (deliver): 2026-06-11 18:02:16 UTC
Total elapsed: 25m 34s (1534 seconds)

6. Application Code Statistics

Metric	Value
Total source files	15
Total lines of code	1758
Tests passing	4/4
Feature branch	feature/mileage-tracker-app
Commit	bf2695f3d0d136e9a3985deddf17f1fc8086428d
